Profile

I'm a driven and self-motivated full-stack developer with DevOps and System Administration experience. I have successfully built and deployed multiple projects, as well as contributed to open source projects and continue to do so. I have a keen interest in building highly concurrent applications and deploying them at scale.

Skills

- Kotlin – Native Android Development
- Golang – Fasthttp, Fiber, Gin-Go, Gorilla-Mux
- JavaScript & TypeScript – React, React Native, Vue, Node.js
- Python – FastAPI, Flask
- Dart – Flutter
- Rust, and Other Languages

Education

B. Tech EEE / Expected Graduation September 2024

I am currently a first year student at GBU Greater Noida, studying Information Technology.

Key Personal Projects

BetterPlayer

(Under Active Development)

A modern video player, fully written with all Modern Android Development Libraries and using the new Jetpack Compose UI Toolkit, uses libmpv under the hood with JNI for hardware acceleration and smooth video playback.

Pasty-Backend

A lightweight pastebin and URL shortener, written in Kotlin with Spring boot.

NyaaChan

A fast telegram bot which scrapes nyaa.si.

Gob-log

A log themed Blog, With VIM Aesthetics. Fully written in go, using fiber.

GBU Agenda

A cross platform app for the schedule of our university, fully written in dart using the flutter SDK.
